

ICR Corrections Update

- Looked at ICR region response after correcting the EMScale
- Used v2.0 of the EMScale package

Response Vs. Eta

(Response using EMScale)
(Response without EMScale)

- Line at 0.85 -> Recalibrating EM Scale shifts overall jet response downward by 15%
- Ratio vs. eta is flat -> change in relative ICR response small

Aug 14, 2002

Results using EMScale

Data Only (no Monte Carlo)

Aug 14, 2002

To Do

- **ToDo**
 - **Adding EC sum to JetAnalyse**
 - **Start processing p11.09 events from the farm**
 - Can look at ICD fraction separately from MG and try to understand what is going on.
 - **NEED DISK SPACE!**
